

Olympic training camp held

by Patricia Cinelli

Some flew in from as far away as San Francisco, Miami and New York. Others came in vans from Rhode Island, Texas, Louisiana and Maryland. Still others traveled by car from Tennessee, New Jersey, Kansas, Indiana, Virginia and Michigan. They all arrived at the doors of Carlin Hall at Gallaudet on Sunday, June 26, ready for a week-long intensive workout in swimming, track and field, wrestling, basketball or volleyball.

More than 100 deaf athletes, coaches and clinicians participated in the first Development Sports Training Camp sponsored by the U.S. Committee for the World Games for the Deaf. The camp, said Bill Simpson, chairman of the U.S. World Games team, gave deaf athletes the opportunity to get the same kind of training readily available to hearing athletes. In addition to learning the newest training techniques, the athletes participated in a regional competition to prepare them to try out for the XV World Games for the Deaf, to be held from July 10-20, 1985 in Los Angeles.

"I love it (the camp). I've learned a lot, a new way of playing volleyball—Japanese style. It was really worth coming here," said Sally Ripley, an 18-year-old from the Kansas School for the Deaf. She has been accepted by Johnson County Community College this fall on a basketball scholarship but said she will try out for the volleyball team for the 1985 World Games because volleyball is her first love. Her

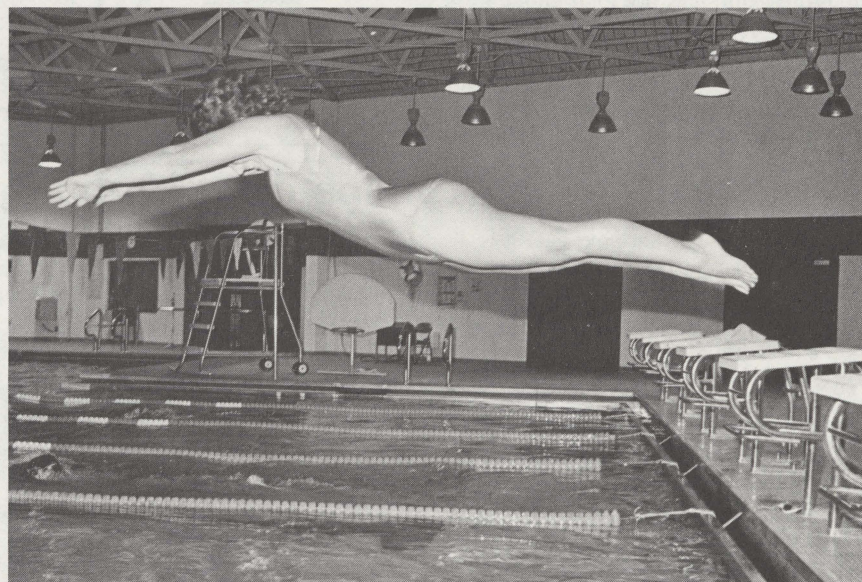

coach, Scott Mose, former women's coach at Rutgers and assistant coach of the women's team at the 1976 Montreal Olympics, has been selected to be head women's volleyball coach for the '85 games. Mose said he is planning to hold a week of volleyball camp next summer for deaf athletes. He runs a sports camp—judo, gymnastics and volleyball—in New York.

Mose was one of the coaches, top in his field, who began a relationship with deaf athletes at Gallaudet last month. Ron Bazil, head track coach at West Point, and Ted McLaughlin, head track coach at Southern Methodist University, have both accepted positions on the 1985 U.S. World Games for the Deaf team staff. "We have some talent here . . . all of these athletes have definite potential," said McLaughlin to a *Washington Post* reporter. Both he and Bazil said one of the most difficult things for them at the camp was communication. They hope to study sign language before the '85 Games.

Happy Hour

The Ole Jim is open on Thursdays and Fridays from 4-6 p.m. for Happy Hour. Faculty, staff and alumni are invited to come and enjoy mixed drinks for \$2, beer for \$1.50 or wine for \$1.25.

Swimming and wrestling were two of the areas in which students received training at the camp.

Area students to attend CASP program

by Patricia Cinelli

Sixteen high school students who will be entering their junior year this fall spent a week this summer at MSSD discovering how their interests and skills can mesh with career opportunities.

These students, from D.C. and the five surrounding states, were part of the Career Awareness Summer Project (CASP), a joint project developed by faculty members of Gallaudet College and the National Technical Institute for the Deaf in Rochester, NY. They came from residential schools, oral and mainstream programs, day schools and total communication programs.

While this summer experience was not the first time students have been exposed to career awareness and information, the program has been designed to "cap" or pull together their experiences, explained Judy Egelston-Dodd, CASP coordinator. Dodd works for Gallaudet's Pre-College division and

NTID's division of Career Opportunities. She said CASP, which is an extension of the National Project on Career Education, focuses on the needs of deaf high school students of average or above-average abilities by offering them an intensive week of activities related to career awareness and exploration.

"Students are supposed to begin to look at their last two years of school and, based on the information they get in CASP, they should pick electives to go along with future career plans," said Carol Beckman, a program supervisor at MSSD involved with the project.

During the week of July 5-9, students participated in activities that included a field trip to the U.S. Government Office of Cartography, where they talked with deaf people in various jobs. Students paired up and visited individuals working on the Gallaudet campus, then shared information about

Charlie Day, coordinator of physical education, recreation and athletics at the Maryland School for the Deaf, was one of the coaches participating in the camp who has had a long involvement with U.S. teams competing in the World Games. He brought 24 athletes with him to Gallaudet from the Maryland School to train in basketball, track and field, and wrestling. "Our kids are still talking about the camp . . . about how rough the sprinting workouts were and how terrific the whole experience was. The only complaint I received was that the camp was not long enough," he said. "I think it was the best week anyone ever had," Day continued. "It was great for our kids to be exposed to different athletes from across the country and different kinds of coaching philosophies. It was a fantastic experience for any kind of athlete."

The U.S. Committee for the World Games team said that next year it is planning to sponsor three regional Development Sports Training Camps—in the eastern, central and western regions of the country.

Sponsored R&D

Grant/contract deadlines

Provided below are application deadlines of selected federal programs that offer potential grant or contract opportunities for Kendall Green faculty, staff and graduate students. More details on programs of interest can be obtained from the Office of Sponsored Research, x5030 (voice or TDD).

Deadline	Program
07/25/83	ED: Research in Education of the Handicapped
09/10/83	ED: Instructional Materials for Mildly Handicapped Individuals
09/19/83	NEH: Youth Project Grants
10/15/83	NSF: Science and Technology to Aid the Handicapped
10/15/83	Kellogg Foundation: Kellogg National Fellowship Program
11/01/83	NIH: Social and Behavioral Research on Aging
No Specific Deadline	NSF: Behavioral and Neural Sciences
No Specific Deadline	NSF: Memory and Cognitive Processes Program

Research on aging

The National Institute on Aging is inviting applications for research project grants and new investigator research awards in its Behavioral Science Research Program. This program is concerned with the social, cultural, economic and psychological factors affecting the processing of aging. Applications are due by Nov. 1, 1983 or March 1, 1984.

This program is coordinated with related programs on aging within the Institute such as biomedical research and clinical medicine, and with the other national institutes of health.

Single project grants range from \$15,000-\$100,000. For more information contact the Office of Sponsored Research or Behavioral Science Branch, National Institute on Aging, Building 31, Room 4C32, Bethesda, MD 20205, 496-7441.

Tips on protecting your lockers

Note: The following article is part of a series that will appear in On the Green periodically concerning crime and crime prevention.

During the 1982-83 school year, one of the crimes that continued to show up in Department of Safety and Security statistics was the breaking and entering of lockers in physical education facilities.

In November, 1982, 23 lockers in the Field House and Hughes Gymnasium were broken into. Items taken from both men's and women's lockers included cash, watches, jewelry and clothing. The value of these items was more than \$550. Thanks to a tip provided by a staff member and investigative work by DOSS personnel, a suspect was identified and arrested. In addition, the suspect admitted responsibility for another 17 locker break-ins in other campus buildings.

In May, 1983, 14 lockers in the Field House were broken into. The value of items taken in these thefts was more than \$250. A suspect has been arrested in connection with these thefts.

CASP

continued from page 1

their visits with other students. They also worked on computers every evening. Instructors from NTID, Gallaudet, MSSD, KDES, the University of Nebraska and University of Rochester used videotapes, slides and films, discussion and hands-on experience to present information on careers.

Parents took part in the first and last day of the project. "They learned to view themselves as workers and role models for their children and also heard a panel of successful deaf adults talk about the barriers they faced in the job market," explained Egelston-Dodd. During the last day of CASP, parents and their children developed a personal career plan to help the students decide which courses to take their last two years of high school and also to discover what colleges offered majors in their fields of interest.

Bostonian Gail Gibson, mother of 17-year-old Kathryn who is a junior at MSSD, said, "I think the program was great for both of us. Kathryn told me her views were changed from the week-long program."

After CASP results are evaluated, said Egelston-Dodd, the program will be packaged and made available to secondary schools to use as an addition to their career education programs.

What can you do? The following advice is recommended when using locker room facilities:

- Do not lock cash, wallets, watches, jewelry or articles of value in lockers. It took the suspects in these cases less than five seconds to break a lock on a locker.
- The only items that should be placed in lockers are articles of clothing.
- Report suspicious persons in physical education facilities to DOSS. The first suspect was caught due to a tip from a staff member who really didn't think the information would help.

Women to gather

Women throughout the Washington area are invited to gather at Mt. Vernon College on Aug. 24-26. The gathering will culminate in a demonstration of resistance on Women's Equality Day, Aug. 26 and participation in the Martin Luther King Memorial March on Aug. 27. The gathering is supported by Mary Ann Beall, a Fairfax, VA resident who spoke at Women's Equality Day at Gallaudet last fall.

The deadline for registering for the event is Aug. 1. For further information contact Mickie Ballotta, x5075.
